Quick Guide - Gigaset PRO DECT Handsets

This guide applies to **Gigaset PRO** handsets (SL800H, S700H, R700H, SL750H, R650H, S650H) to be registered on an already installed and provisioned **N870IP / N670IP** base station.

1. Prerequisites (to be done by an administrator)

In the **Kiosk** (*My services > Telephony > Manage my IP telephony*):

1.1. **The handset must be added to the list of phones**, with its **IPUI** (the handset's unique identifier: on the handset, open the menu and type *#06# — nothing is displayed while typing, the IPUI appears once the full code is entered, it's the 1st line).

1.2. **The handset must be added to a base station, with a number** (SIP account).

1.3. **DECT registration must be open for 10 minutes** (*Multi-account devices*, "DECT" button).

Without these three steps, the handset cannot register.

2. Register the handset

2.1. Insert the handset batteries (or place it on its charger) and switch it on.

2.2. On the handset, choose the language at start-up, then depending on the case (system PIN: **0000**):

2.2a Handset never registered: soft key **Register** → *searching for a base ready for registration* → enter the system PIN.

2.2b Handset already registered to another base (or showing "No Base"): **Menu** → **Settings** (gear icon, bottom right) → **Registration** → **Register Handset** → enter the system PIN.

2.3. Your number or name is displayed: you can make calls.

3. LDAP directory

3.1. The LDAP directory is available on the handsets for **Centrex** customers.

4. Going further

For all other functions (keys, settings, voicemail, Bluetooth, etc.), see the official Gigaset user guide for your handset (PDF, English, with the N870IP PRO base):
