

Quick Start Guide — Yealink MP58-WH E2 Teams

This phone is a **native Microsoft Teams** device: it is not provisioned by Celeste. All setup (sign-in, updates, management) happens through your professional Microsoft Teams account and your company's Teams Admin Center.

1. Plug in the phone

1.1 Connect the Ethernet PoE cable (class 3) to your network — power adapter not included (optional).

1.2 The phone starts up and shows the Microsoft Teams home screen.

2. Sign in to your Teams account

2.1 Note the code shown on the phone screen.

2.2 On a PC or smartphone, go to <https://microsoft.com/devicelogin>

2.3 Enter the code, then sign in with your professional Microsoft Teams credentials.

2.4 The phone connects to your account automatically — no need to type a password on the phone's keypad.

 You can also sign in directly from the phone's touch screen by entering your credentials, but the method above avoids typing a long password on the handset's keypad.

3. Use your phone

3.1 Dedicated **Teams** button: direct access to call history, contacts and your synced Outlook calendar.

3.2 Dial a number on the keypad or search for a contact on screen.

3.3 Large 7" color touch screen. "WH" stands for **Wireless Handset**: a **Bluetooth cordless handset** is included, usable up to 10 meters from the base during a call.

Need help?

A.1 Device management (updates, profiles, calling policies): handled exclusively through your company's Microsoft Teams Admin Center — <https://admin.teams.microsoft.com/devices/ipphones> (access reserved to your IT/Microsoft 365 administrator)

A.2 Expansion module: up to 3 EXP50 modules (optional) for more speed-dial keys

A.3 Full manufacturer manual: <https://www.yealink.com/website-service/download/MP58-WH-E2-Teams-Datasheet.pdf>

A.4 Celeste support: <https://www.celeste.fr> and <https://www.celeste.ch>
